CAMELEON

The Celette Cameleon is a universal jig system for automotive repair professionals, combining precision, versatility, and efficiency to enhance the quality of repairs

Modular Design:

The jig can be customized to fit a wide range of vehicle types, making it suitable for various makes and models.

Adjustable Fixtures:

It includes a variety of adjustable fixtures that can securely hold different parts of a vehicle, such as the chassis, doors, and body panels.

Precision Measurement Tools:

Equipped with advanced measuring systems, the jig ensures accurate alignment and positioning according to OEM specifications.

Multiple Anchoring Points:

The jig provides numerous anchoring options, allowing for stable and secure positioning during repairs.

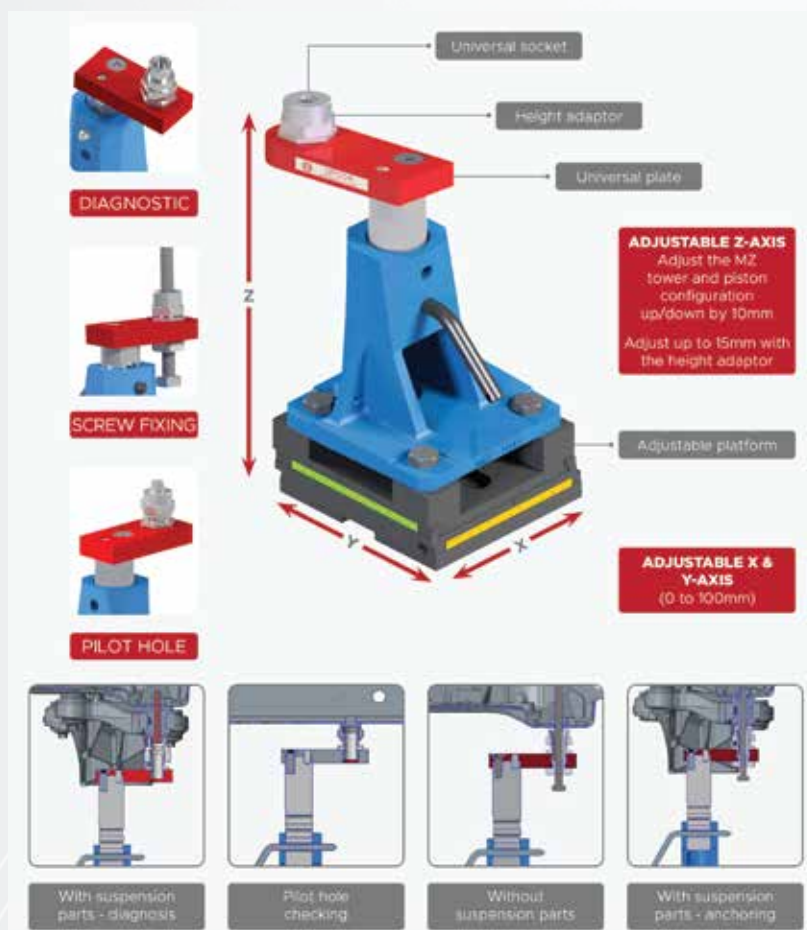

Interactive 3D software:

working with CELETTE AI Webtool, the software offers opportunity to customize your own way of setup and repair to facilitate the repair process.

“Simple steps to ensure your quality of measurement and repair”

CAMELEON

The Celette Cameleon universal jig system is a customizable toolkit designed for creating highly accurate jigs for any vehicle. With modularity of 1 mm on each X, Y, and Z axis, it allows precise control over the length, width, and height of various points on the car during repairs.

The Cameleon provides comprehensive fixing solutions for multiple attachment points, including pilot holes, subframe connections, front bumper mounts, and strut tower fixtures.

It is available in various repair modes, including with mechanics in place, without mechanics, and diagnostic options.

Fixation pare-chocs 1 point

Fixation pare-chocs 2 points

Fixation Amortisseur

Fixation Berceau

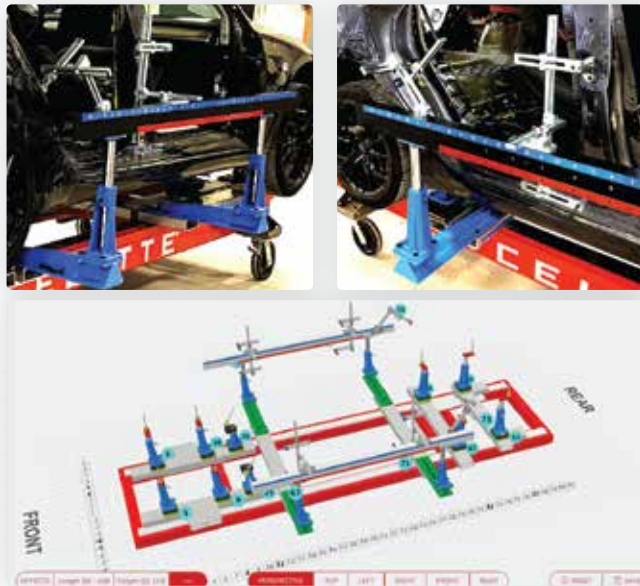

The universal jig system features a user-friendly web-based software that maps the layout of each car using a 3D database sourced from automotive OEMs worldwide.

You can customize the universal jig setup online through an interactive 3D interface tailored to your repair environment. Additionally, diagnostic, pre-repair, and post-repair reports can be generated and sent to insurance companies or customers using the Celette AI Webtools.

CAMELEON UPPER BODY JIG

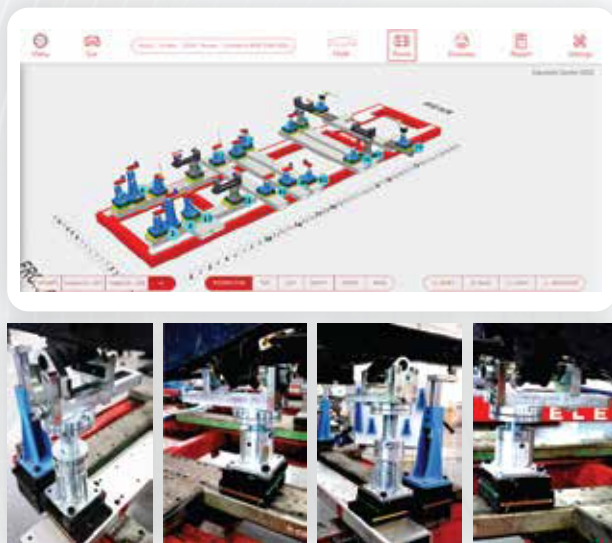

CAMELEON UPPER BODY FIXTURE SET
REF NO: CAM04.032

- The Cameleon Upper Body Jig is a specialized tool designed for precise repair and alignment of the upper body structures of vehicles.
- It includes adjustable fixtures that allow technicians to secure different upper body components, such as doors, windshields, and roofs.
- The design provides technicians with easy access to all areas of the upper body, facilitating efficient repairs.

CAMELEON CHASSIS

ADD-ON KIT CAMELEON CHASSIS
REF NO: CAM03.246

- Cameleon chassis is ideal for repairing light truck vehicle ladder frame.
- It anchors the chassis firmly while making pulling & repair operation.
- The adaptable Cameleon chassis is suitable for holding all the critical fixation in the ladder frame.
- It also works as a holding device during replacement of new components.

CELETTE CAMELEON FOR TRUCK CABIN REPAIRS

The Cameleon system is adaptable to different vehicle models, providing a customizable setup for various truck cabins. It allows for precise measurement and alignment, crucial for restoring structural integrity.

Celette Cameleon provide solutions to secure accurately the truck cab tilting points. By focusing on the tilting points, the Cameleon system helps ensure that the repaired truck cab will perform correctly once reassembled. This attention to detail contributes to the overall quality of the repair, reducing the likelihood of future issues.

The Cameleon's versatility provides access to all upper body fixing points, including those for the doors, windshield, bumper, and other areas that support the repair process.
